# Technology at work for you

## CONNECTING YOUR BUSINESS TO THE TECHNOLOGY RESOURCES YOU NEED

At **Fuzzellogic solutions** we're committed to producing high quality, innovative intelligent **Software Solutions** for *your* business challenges.

**Fuzzellogic solutions** started in 2007 with a simple business philosophy: "... *Integrity, Technical expertise, Honesty and Commitment in everything we do.*"

By embracing **change** and constantly **evolving** our practices we are able to provide professional software delivered through the web, interactive desktops or mobile devices.

## the *right* technology for the job

**Microsoft .net** is a key technology that allows us to bring our expertise and experience to build seamless and secure applications that have the ability to model a wide range of business processes.

**Java** is a mature language that allows us to provide value to our clients through application development, integration and mobile solutions.

**Ajax** and its related technologies allow us to produce rich web based user experiences that are not only stunning but highly functional.

**Ruby, JavaScript, Python** are used where their dynamics are required or provide the best return.

**SOA** provides a development model for interconnectivity.

At **Fuzzellogic solutions** we select the correct technology for the job.

**Data** is one of the key assets in a modern organization, and **Fuzzellogic solutions** provides solutions in securing, migrating and maintaining your data using the latest technologies and practices, with speed and accuracy as key goals.

We will provide an accurate view over your data in the form of **reports** that are efficient and accurate and delivered in a variety of formats that meet your organizations policies and practices.

Using **Agile** and a "test first" approach we are able to provide constant feedback and an iterative release cycle.

**Fuzzellogic solutions** actively pushes the boundaries on technology and by honoring our commitments, we have successfully serviced clients both locally and internationally.

Utilizing our local, off shore resources and strategic partners **Fuzzellogic solutions** provide software for our clients across diverse sectors including **Media, Banking, I.T, Insurance, Marketing and Education.**

We provide solutions, services and processes that include online money transfer, portfolio management, branding and logo design, software license and asset tracking, online web presence, business compliancy solutions, productivity and monitoring tools and utilities, reporting solutions, quality reviews, training, mentoring and coaching.

### SERVICES

- ARCHITECTURE
- DESIGN
- DEVELOP
- MORDENIZE
- DOCUMENT
- REPORTING
- DOCUMENTATION
- CONSULTANCY
- DATABASE SERVICES

### CUSTOM SOLUTIONS

Custom solutions are crucial to the success of any business striving to meet customer needs and stay ahead of the competition. **Fuzzellogic solutions** will tailor solutions that allow you to focus on your clients and maintain a competitive edge while still maintaining control and focus of your solutions.

### WEB SOLUTIONS

A web presence is essential in maintaining a customer centric focus. More people than ever before rely on the web when seeking a product or a service.

With a web solution from **Fuzzellogic solutions** you reach your customers all day every day.

### EBUSINESS SOLUTIONS

The web is more than just a marketing tool; it's a key business tool. Even local businesses can use the web to boost business, increase revenue, increase brand awareness, conduct market research, create online communities and so much more.

**Fuzzellogic solutions** will tailor solutions to meet your goals.

# Support, maintenance and enhancements

SUPPORTING YOU TO MEET CHANGE

At **Fuzzellogic solutions** we're not only committed to producing quality solutions that provide real value to your business, we also provide support, enhancements and maintenance on existing software. We understand that business focus changes, bug appear and software ages.

**Fuzzellogic solutions** will create training sessions that provide key information and knowledge for your business where needed. You will learn how to apply **OO** design principles and **patterns, domain driven design** and methodologies to produce extensible, maintainable applications.

Our sessions will take you beyond the buzz words and hype and help steer your teams towards results and success.

## TRAINING AND MENTORING

- OO DESIGN PRICIPLES
- DESIGN PATTERNS
- REFACTORING
- UNIT TESTING
- DOMAIN DRIVEN DESIGN
- UNDERSTANDING UML

**Fuzzellogic solutions** will ensure your business is in a position to rapidly accommodate the challenges it faces

## inspired knowledge for growing teams

ADVANCED SESSIONS AT THE SPEED OF BUSINESS

We believe that planning for change is important and we provide training solutions to keep your team informed and inspired to make the changes necessary for the continued growth of your business.

### Mentoring and coaching:

During these sessions, we not only part knowledge, but build relationships that last far beyond the mentoring session.

**Pair programming** is a key tool that provides insight into the team resources and technical background. This insight will be used to tailor sessions that will be meet immediate and future goals.

### Objectives:

At the end of the sessions, you will come away with a deeper knowledge of **OO** design principles, the use of common design patterns in software, understanding the use of UML in design, the benefits of test driven design and best practices.

### Unit testing:

**Test first?** Explorer the benefits of using the tests to draw out the requirements. Unit tests will form the corner stone in ratifying the design and serve as

- 'test to break' for new requirements
- Aid in the estimation process.
- A valuable training tool for new developers
- A robust form of living documentation

## TRAINING

Knowledge is key to successful software. **Fuzzellogic solutions** provide you and your teams with the insight, the knowledge and inspiration to produce robust, reliable and scalable solutions.

## MENTORING & COACHING

**Fuzzellogic solutions** will provide sessions that range from keystone technologies to full project deployment.

All sessions will focus on building a stronger, more knowledgeable, more confident and more inspired team .

## BUSINESS MODELS

**Fuzzellogic solutions** provide a host of diverse models to suit your business. **Fuzzellogic solutions** offer complete **product development, outsourcing** facilities, on-site **contractual** resources, **software as a service** and an **incubator model**.
